

Spencer-Van Etten Central School District

Asbestos Safety Notice

In compliance with the US Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act (AHERA), the district has performed asbestos re-inspections of each of our school buildings for asbestos-containing building materials. The inspection findings are in the asbestos management plan on file in each school office and the district office. The EPA requires the district to perform re-inspections of the asbestos materials every three years. In June 2019, a certified asbestos inspector performed these re-inspections. A certified asbestos management planner reviewed the re-inspection results and developed recommended actions the district should take to safely manage the asbestos material in our buildings. All the asbestos material in our buildings remains in good condition and we will continue to manage them in place as recommended by EPA guidelines and the asbestos management planner. Residents wishing to discuss or review the asbestos management plan may contact the Director of Facilities at 589-7130 during school hours.
